## What this is

One page for a client who needs install, upkeep, and operator training.

Not a contract. Not FDA approval. Products are not cleared or approved by FDA.

## Products

Quinn.Gate — public catalog of official projects and URLs. Weeks 1–2 to install.

coins.cash — live field test of those listing rules. Week 1.

Autonomous Database Guardian — locked schema, drift report, human approval. Weeks 1–4.

## Install / upkeep / training

Install: static deploy on the official domain, or one dataset locked for Guardian.

Upkeep: monthly official-link or schema check. Quarterly review. Twelve-month term.

Training: one to three operator sessions (add a listing, read a drift note, refuse an unofficial URL).

Laboratory on-site: coming soon. Work runs online or remote until then.

## Bench

Senior engineers and scientists lead. Every rank may apply. Applications stay open.

Identities stay protected. Names stay off the public site.
